# Shelving system -Super 1-2-3

## DESIGN OF THE SHELVES AND TECHNICAL INFORMATION

### Shelving frame

T-shaped steel profiles B69/T27mm connected with cross and diagonal struts to form a frame. The vertical profiles are provided with hook-in cut-outs at 33 mm intervals to accommodate the fixtures.

Sendzimir galvanized surface. upright heights: 1972, 2236, 2500, 3028mm

### Bracing

Longitudinal bracing of the shelving is achieved by profiled T21/H47mm longitudinal beams! Plug-in version.

Sendzimir galvanized surface.

Maximum load/ pair of beams:

L900mm/280kg; L1050mm/235kg; L1200mm/205kg; L1350mm 180kg; L1500/145kg

### Shelves

Shelves made of sheet steel, suspended in longitudinal beams and height-adjustable with these in 33 mm increments.

Shelf front height like side rail H47mm! Long sides folded four times, deep sides folded three times.

Sendzimir galvanized surface.

Shelf depths: 320, 400, 500, 600, 700, 800 mm

Shelf lengths: 900, 1050, 1200, 1350, 1500mm

Bay lengths: Basic bay=FB length+74mm, add-on bay=FB length+6mm
